

How to Think Like a Mathematician: A Companion to Undergraduate Mathematics

By Kevin Houston

Cambridge University Press, New Delhi, India, 2009. Paperback. Book Condition: New. First Edition. Looking for a head start in your undergraduate degree in mathematics? Maybe you've already started your degree and feel bewildered by the subject you previously loved? Don't panic! This friendly companion will ease your transition to real mathematical thinking. Working through the book you will develop an arsenal of techniques to help you unlock the meaning of definitions, theorems and proofs, solve problems, and write mathematics effectively. All the major methods of proof - direct method, cases, induction, contradiction and contrapositive - are featured. Concrete examples are used throughout, and you'll get plenty of practice on topics common to many courses such as divisors, Euclidean algorithms, modular arithmetic, equivalence relations, and injectivity and surjectivity of functions. The material has been tested by real students over many years so all the essentials are covered. With over 300 exercises to help you test your progress, you'll soon learn how to think like a mathematician. Contents Preface Part I. Study Skills For Mathematicians: 1. Sets and functions 2. Reading mathematics 3. Writing mathematics I 4. Writing mathematics II 5. How to solve problems Part II. How To Think Logically: 6....

Reviews

Merely no phrases to describe. Better than never, though I am quite late in starting reading this one. It's been written in an extremely easy way which is merely following I finished reading this publication through which in fact transformed me, change the way in my opinion.

-- **Pedro Renner**

Completely among the finest book I have actually read through. It is probably the most remarkable book we have studied. I discovered this book from my dad and I suggested this book to learn.

-- **Georgiana Pacocha**
