

A Textbook of Electric Lighting and Railways Volume 2 (Paperback)

By International Schools

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1901 edition. Excerpt: .middle wire and not between the outer wires. The system is easily unbalanced. Three wires are run to the motors. Twophase systems are generally installed as two separate twowire systems, four wires being run to the motors and the 76 Line FIG. 18. lights being divided equally on the two two-wire circuits. This gives better regulation (see Fig. 18). In this case, the current in each of the four wires will be one-half that which would flow if all the lamps were operated on a regular twowire system. 46. The monocyclic system is used only in transmission and in connection with motors. Wiring for lights on a monocyclic circuit is just the same as on any other two-wire circuit of the same voltage. The third wire is brought in only when a motor is installed. For its connections see Fig. 19. 47. Generally speaking,...
