DOD and its military services and units did not know how many Joint 8 Service Lightweight Integrated Suit Technology (JSLIST) - commonly referred to as chem-bio suits - they had, their condition, and where 9 they were located. This lack of visibility was due to several factors, including the use of nonstandard, nonintegrated, stovepiped systems. Nonintegrated systems are unable to share data across business applications and therefore, multiple manual data entries must be made into numerous stand-alone systems, which result in errors, add significantly to administrative costs, and generally exacerbate asset visibility problems. The methods used to control and maintain visibility over JSLIST ranged from stand-alone automated systems, to spreadsheet applications, to pen and paper, to nothing at all. For JSLIST, the result was that DOD was excessing and selling these suits on the Internet for pennies on the dollar, while at the same time procuring hundreds of thousands of new garments annually. Similarly, a few years ago, the Defense Logistics Agency (DLA) had problems identifying and removing from its inventory defective Battle Dress Overgarments...
