## SPACE: U.S.-KOREA FIGHTER COPRODUCTION PROGRAM: T-NSIAD-90-29

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 22 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. GAO discussed the Korean Fighter Program (KFP), specifically Korea's aerospace industrial goals and plans. GAO found that: (1) Korea's coproduction program was intended to meet Korea's military modernization requirements and play an important role in Korea's aerospace industrial development goals; (2) the Department of Defense (DOD) inhibited Korea's negotiating position and took steps to make certain technologies unavailable for licensed production; (3) the Korean aircraft industry had limited experience compared to the level of manufacture and production management contemplated under KFP; and (4) the production arrangement negotiated between Korean and U. S. contractors was intended to maximize technology transfer and the industry's control over KFP. GAO also found that: (1) Korea has attempted to maximize the quantity of aircraft it can produce under license and minimize the quantity of aircraft it purchases directly from the United States; (2) DOD provided the Korean government with a list of items that Korea could not produce, but had to purchase through foreign military sales; and (3) the Korean government imposed special offset guidelines for fighter aircraft competition, but it could not determine the technology transfer and economic effects of the offsets. This item ships from La Vergne, TN. Paperback.
